

Dear Dr. Ayoub,

Thank you!!!

June of 2011 was the first time I walked through your doors. I had a lot of issues, both dental and mental. I was mortified of what I knew was in store for me because I had not been to the dentist since I was a little girl. After my first visit my fears were confirmed as I learned that I had about three pages of work which needed to be done including four root canals, five fillings, two extractions, a deep cleaning, an implant, and TMJ issues.

Having anxiety issues with doctors' offices and money issues with my wallet I knew that this was not going to be an easy journey. Through all of my fears, tears, and pain you and all of your magnificent associates held my hand and gave me strength to make it through. The staff was also excellent in helping me with my financial concerns and understanding every detail of the process. You're all truly amazing!

During each and every visit to McDowell Dentistry the staff is always exceptionally friendly and welcoming. I always feel comfortable walking into the office knowing that I'll get the very best dental care and attention from every employee. My concerns are always listened to and respected, and I'm always treated with patience and understanding, which I truly appreciate.

I can never thank you and your elite practice enough for always taking the best care of me. I feel like part of your family every time I visit. As long as I'm in Arizona I'll never see another dentist again. You and your team are true experts with exceptional hearts. I will always recommend you and your wonderful team.

Thank you!

Sincerely,

Lacey Hubschmitt
